Dear Music Lover!

Please find attached my CV as an application for the position of Front-end Engineer, as found both on LinkedIn and your careers website.

I am currently a freelance front-end developer - having just finished a working on a large, data-intensive web application. Although I enjoy the challenges that freelance brings, I am looking for a position that offers the opportunity to go back to the in-house environment, especially for a company that I admire such as yourselves - as a Spotify premium member for 5 years!

The role excites me, not only as a huge music lover and passionate analytics fan, but as a position that sounds challenging and creative, while also being supportive of personal development.

Meeting my own high standards of work, as well as the expectations of others, is important to me and I strive to be adaptable, resourceful, creative and self motivated. I believe myself capable of fulfilling the demands set out by the job application and would appreciate being considered for the role.

Thank you for your time, I look forward to hearing from you soon.

Regards,

Dan Bouckley
